

Anyone who believes they have the symptoms of COVID-19  
(or if you are required to self-isolate or have any similar flu-like symptoms)  
you must stay at home.

**\*\*NEW UPDATE ABOUT TEMPERATURE SCREENING BELOW\*\***

## Weekend of March 21-22, 2020

### General Updates:

**As of March 20: There are NO confirmed or presumptive cases of COVID-19 at HPC**

- *Unless you hear otherwise from IPL or your Supervisor, plan to come in as usual through the weekend and Monday. At this time, current construction activity is unchanged*
- IPL is in regular consultation with the Government and different municipalities to ensure compliance and exchange of latest information and activity at the HPC site
- The health and well-being of workers at site remains our first priority. IPL is taking steps to make working conditions as safe as possible for those working on our jobsite.
- We had a meeting with reps of more than 30 site contractors this past week to exchange information and get feedback on your concerns, and will do so again next week.

### Busing

- Buses have been added, and more will be added the week of March 23<sup>rd</sup> to busier routes to help enhance current Social Distancing practices. Routes have also been looked at for improvement options (where best to assign the extra buses)
- Bus cleaning has been increased – see posted schedule on the bus for more information
- We are also wiping the bus interior down 4 times daily with a COVID-killing agent, specifically targeting hand rails, arm rests, head rests, handles, scanners and washrooms.

### Social-Distancing - Lunchrooms

- Lunch times are being staggered to reduce amounts of people being together in one place
- Lunchrooms and washrooms are also getting increased and targeted cleaning

### Next Steps

- Owing to the ongoing global demand for medical PPE, we are working to secure a steady supply BEFORE we implement any temperature testing protocol. See the next page for more information

## **STANDING REMINDERS**

- If you develop flu-like symptoms while at site, do not go to the onsite clinic. Notify your supervisor immediately. You should only go to the onsite clinic if you are injured or experiencing a medical emergency
- Anyone who believes they have the symptoms of COVID-19 (or if you are required to self-isolate due to travel, exposure to the virus, or if directed to do so by your local health authority), or if you have any similar flu-like symptoms must stay at home: **do not come to site**
- Call your Supervisor immediately and report your condition
- Contact the Alberta Health Line (811) to report your condition and arrange for a medical test
- If the test is negative, inform your Supervisor and return to work as directed
- If the test is positive, then a 14-day quarantine/isolation period will begin *from the day you are informed of the positive result*
- Keep in regular contact with your Supervisor during this time, as directed

Work safely,

Bill Schneider  
Director, Construction

## **NEW TEMPERATURE PROTOCOL: DELAY IN SOURCING EQUIPMENT & OPTIONS**

Owing to the current global demand for medical equipment and PPE, we are delaying the start of the temperature check program until we have some assurance of getting enough PPE for the medical team to be able to properly sustain the process.

We are also exploring alternate options that might be available to us, and will share that information with you once we have confirmation on the availability of other supplies.

This is a dynamic situation and additional steps may be taken as it evolves. We ask you to stay patient and continue to ask questions.
